

# LIQUID SEAWEED

## BIOFERTILISER

**Nourish Your Crops for Strong Root Growth and Nutrient-Rich Harvests**

**Liquid Seaweed Biological Fertiliser**, activated with beneficial microorganisms, can be applied at any time of the growing season to promote vigorous root systems and produce highly nutritious crops. Rich in nutritional content, Liquid Seaweed is packed with essential minerals, including nitrogen, phosphorus, potassium, and trace elements such as iron, zinc, and magnesium.

## BENEFITS

- **Diverse Uses:** Beneficial for mixed crops, natives, orchards, fruit trees, and pasture.
- **Builds Plant Immunity:** Strengthens plants against disease and environmental stresses.
- **Root Stimulation:** Improves root growth and long-term crop resilience.
- **Increases Chlorophyll Production:** Healthier, greener plants.
- **Improves Nutritional Value:** Accentuates taste, aroma, and shelf life.
- **Biodegradable:** Leaves no toxic residue in soil. Safe near waterways.

**SONIC Liquid Seaweed** is derived from certified organic Australian *Durvillaea Potatorum* (Bull Kelp). Cold fermentation preserves all the minerals and trace elements in seaweed, in a bio-available state.

**No fillers, additives or preservatives.**
