SONIC Natural Farming
Innovative BIOLOGICAL SOIL CARE SOLUTIONS

# **BIOLOGICAL FERTILISERS** USE, CONTAINER CARE, & STORAGE

**SONIC Natural Farming Biological Products** are liquid concentrates that must be diluted before use. Use lower rates for early growth and foliar applications, and higher rates as the crop grows.

## USE

- Fill the spray unit or container with water before adding product to reduce foam.
- Use within 48 hours of dilution. Do not store diluted product.
- A white yeast film on the surface is normal.

**Seed treatment:** SONIC Liquid Seaweed can be used as a seed inoculant when direct seeding, and as a root pre-soak before transplanting seedlings.
**Foliar spray and soil drench:** Apply periodically through the plant's growth cycle.

## OPTIMAL APPLICATION TIMES

- Apply in cool conditions: early morning, late afternoon, evening or overcast weather.
- Avoid applying in full sun or when temperatures exceed 27°C.

## APPLICATION RATES

- See the Rates and Methods page at www.sonicnaturalfarming.com.au for crop-specific rates, dilutions and methods.

## GRAZING

**SONIC Liquid Fish:** contains fish-derived material (restricted animal material). Do not feed to cattle, sheep, goats or other ruminants. For withholding details, visit www.sonicnaturalfarming.com.au.
**SONIC Liquid Seaweed:** no withholding period.

## CONTAINER CARE & REUSE

- Clean containers immediately after emptying and rinse thoroughly. Add the rinse water to the spray tank or apply it to land, not to drains or waterways.
- For difficult stains, use a high pressure hose or a brush and warm water. Do not use chemical cleaners. Dry upside down where possible.
- Do not reuse empty containers to store food, drink or stock water.

## STORAGE

- Products are made to order with no artificial additives or preservatives.
- Store in a cool, shady place, away from direct sunlight. Containers may have vented lids with an outlet valve: allow venting and do not seal tightly.
- Use within 3 months of the packaging date marked on the container.
- Discard if the product darkens or develops an unusual odour. Keep away from food, feed, children and animals.

## SAFETY

- SONIC Liquid Fish contains fish. People with fish or seafood allergies should not handle it.
- Wear gloves and eye protection. Avoid breathing spray mist. Wash hands and skin after use. Do not allow concentrate to enter drains or waterways. Refer to the Safety Data Sheet for each product.
